

Ways To Boost Your Child's GENERAL KNOWLEDGE

Inculcate a habit of reading

Try making your child read newspapers, magazines, and GK books daily. This will make them gain knowledge of current affairs.

Discuss various topics

Involve children in healthy discussions about different topics. Ask them about their views on a specific event or a sport.

Use a globe

Take the help of a globe so your child can understand the structure of our planet, lands, and countries visually.

Watch sports

Spend time watching popular sports like the World Cup and the Olympics with children.

Watch quiz shows

Encourage your child to watch quiz shows online with you. Ask them to answer questions themselves while watching these shows.

Visit museums

Museum trips are a good way to enhance general knowledge about history and science.
