

# CONDITIONS THAT HAVE SYMPTOMS SIMILAR TO MENINGOCOCCAL MENINGITIS

## ENCEPHALITIS

It is brain inflammation due to infection caused by different viruses.

Symptoms may include drowsiness, hyperactivity, headache, and weakness.

Symptoms similar to those of meningitis are speech disorders, convulsions, paralysis, and a stiff neck.

## ROCKY MOUNTAIN SPOTTED FEVER

It is a bacterial infection spread through the bite of ticks.

Fever and rash are the major symptoms.

As the infection progresses, there may be symptoms similar to meningitis, such as headaches, chills, seizures, stiff neck, and fussiness.
