

# Musical Games

## For Your Little Ones

### Musical masterpiece

Give each child a sheet of paper and colored pencils. Let them start drawing as you play the music and stop it when you switch it off. Now, swap the desk and continue the musical masterpiece elsewhere.

### What's that sound?

Introduce the sounds of different instruments to the little musicians. Then play a simple song with different sounds and ask them to identify which is what.

### Spin the microphone

Have the children sit in a circle. Place the mic in the center and spin it. Wherever it stops, that person has to complete a musical dare.

### Dance with props

Place different props on a table and make a dance floor. One person plays the music, and the rest of the children have to pick a prop randomly and use it best when dancing. Record and watch later for a super fun time.

### Mood music

Play different songs and ask your tiny dancers to match their steps according to the song's mood.
