

Steps For Cleaning

Wheeled Coolers

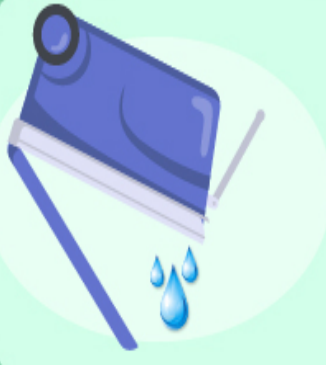

01

Switch off and unplug the cooler.

02

Rinse out any food or drink residue from the inside.

03

Pour soapy warm water inside and use a soft sponge to clean.

04

Clean the tough stains or spots with bleach.

05

Rinse out thoroughly with clean water.

06

Wipe the exterior part of the cooler with a wet soft cloth.

07

Use a dry towel to wipe off the outside and inside of the cooler.

08

Let the open cooler air dry before using it.
