

Gestures To Say *Goodnight* To Your Wife Without Actually Saying It

Kiss her on the forehead as you lay face to face on the bed.

Hug her from behind and whisper, "what would I do without you" before dozing off in each other's arms.

Give her a head or foot massage as she dozes off.

Write something sweet and romantic on the foggy mirror after showering in the night.

Say nothing but make it a routine never to sleep without kissing each other. This can be your way of saying goodnight.
