

TIPS TO PREVENT INGROWN HAIR

Exfoliate before and after shaving to keep the dead skin from causing ingrown hairs.

Use warm water to open the pores for a better shaving experience.

Finish off the shave by splashing cold water to shrink the pores.

Moisturize the skin after every shave to prevent ingrown hair caused by razor bumps.

Always shave in the direction of the hair growth to keep the hair from getting pulled.

Always use a clean and washed razor to keep bacteria from getting into the hair follicles.
