

How To Make An **IMPACT** Through Your Status?

Keep it short. The essence may get lost within the long sentence.

If you are using it as a caption for your picture, make sure the status rightly speaks about what the image is about.

Don't belittle others or use any names. That would become more of an arrogant status.

Choose a status that does not entirely contradict your personality because people who know you may end up making fun of it for being a pretend quote.

Don't give back-to-back statuses. That would take away from the powerful impact you want to make and just become a show-off post.
