

# QUESTIONS TO ASK YOUR DOCTOR ABOUT BOTOX DURING LACTATION

- Is the procedure regarded as safe by a credible authority?
- Does the procedure in any way affect breast milk supply or quality?

- Are there possible side effects for my baby?
- Will maternal side effects, if any, affect the breastfeeding infant?

- How long will the procedure's results last before I need it again?
- Do I need to sign a consent form that includes aspects of the baby's health?
