

# Types Of *Diapers*

## Disposable

It is the most convenient option and has adequate absorbency to prevent leakage. Infants can wear them for a long time.

## Cloth

It is the traditional option and a cost-effective approach. These diapers are washable and reusable. However, they may offer less absorbency.

## Flushable

It comes with flushable liners used inside a reusable shell. Some flushable liners are also compatible with cloth diapers.

## Pull-up

Used commonly while potty training your child, it looks similar to underwear and is easy to put on and take off.

## Hybrid

This is a combination of disposable and cloth diapers. It has an outer cloth layer and an internal disposable insert.
