

# AMAZING FOREST FACTS FOR CHILDREN

Forests cover 31% of the Earth's land area.

The highest level of biodiversity has been recorded in the Amazon rainforest.

The livelihoods of about 1.6 billion people worldwide depend on forests.

Forests trigger rainfall and keep the soil in place.

Forests clean and filter the water of nearby water bodies.

A mature tree can supply two to ten people with enough oxygen daily.

Many species of trees can live from 100 to thousands of years.

Trees can reduce and block loud noises, helping manage noise pollution.
