

## Tips To Follow

# To Pick The Right

# TOY GARAGE

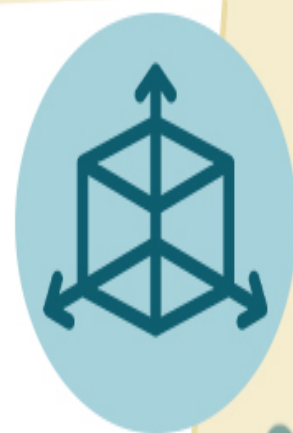

Invest in plastic toy garages if you want an easy-to-clean toy. However, if you want to go eco-friendly, you can choose wooden toy garages.

Ensure that your toy garage is easy to assemble and only requires a few tools to bring the parts together.

Consider the size of the toy garage based on your convenience, as some may occupy more space while others need minimal space.

You can consider toy garages that come with additional accessories for added fun. However, ensure the add-ons do not pose a choking risk.

Note that a hand-operated garage can help improve your child's hand-eye coordination and motor skills.

Select a toy garage theme that interests your child.
