

## How To Ensure Buying

# The Best Life Jacket

## For Your Baby?

Ensure the jacket has been tested and approved by reliable agencies for safety.

 Choose the right life jacket type for the water body you plan to visit.

Select the life jacket appropriate for your baby's weight and size.

 Opt for bright-colored life jackets for the easy visibility of your baby from a distance.

Make sure the jacket has enough straps to tie the baby securely.

 The jacket should also have a good-quality grab handle to catch the baby.

Ensure the jacket has a strap between the legs to prevent it from accidentally coming off.

 Prefer jackets with good head support for babies and younger children.
