

Toilet Auger

VS.

Drain Snake

Unlike a drain snake, a toilet auger is longer and suitable for wide pipes.

A toilet auger is the best bet to remove dense blockages, while a drain snake is ideal for medium blockages.

A toilet auger disintegrates the clog in the sewer line, whereas a drain snake retrieves the clog to the surface.

A toilet auger is heavy-duty in comparison to a drain snake.

A drain snake is a multi-purpose tool used for sinks, bathtubs, and showers, besides a toilet drain.

Unlike a drain snake, the toilet auger has a uniform shape.
