

STEP-BY-STEP GUIDE FOR APPLYING A LIP LINER

1
Prep your lips by exfoliating and moisturizing them before using the lip liner.

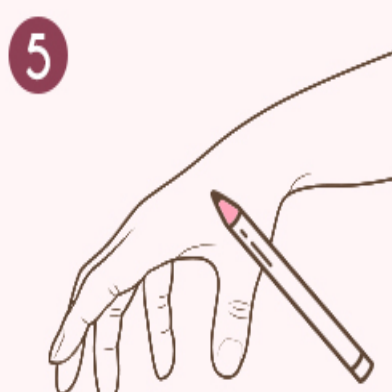

2
Wait for at least 20 minutes to allow the balm or the moisturizer to dry.

3
Apply some primer to your lips to get a long-lasting effect (You can also use a concealer or foundation in place of a primer).

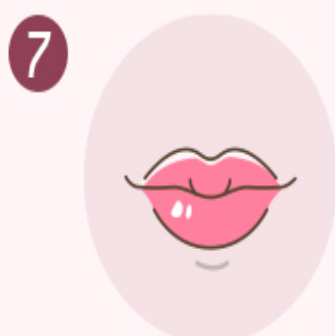

4
Choose a lip liner color that matches evenly with your lipstick color and sharpen it to get a defined outline.

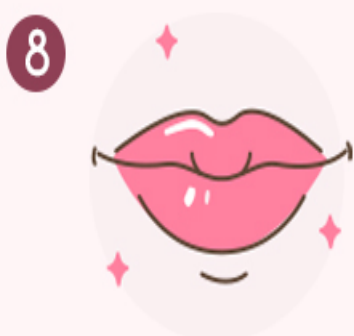

5
Before using it on your lips, warm up the liner tip on the back of your palm so that you get a smooth glide.

6
Slightly part your lips and trace the natural outline of your lips starting from the center top and bottom and then work it outwards eventually.

7
Remember to move the liner in light, short strokes to ensure a defined shape.

8
Complete the look by applying your lipstick, keeping the outline in mind.
