

Tips To Follow When Buying A Pressure Water Hose

Select the hose diameter per their use – ¼ inch for residential use and ⅜ inch for commercial use.

Choose a plastic hose for light to medium-range purposes.

Use a rubber or polyurethane hose for heavy-duty tasks.

Consider a longer hose length to be on the safe side.

Choose a hose connector that is compatible with the pressure washer machine.

Look for a water hose made with high-quality materials for durability.

Ensure the hose you choose is easy to use.
