

# Steps For Cleaning Cooling Racks

## STEP 1

Fill a small kitchen plastic tub with warm water and some dishwasher soap.

## STEP 2

Invert the dirty cooling rack and immerse it in the soapy solution.

## STEP 3

Allow the rack to soak in the solution until the food particles loosen.

## STEP 4

Gently scrub the rack with a sponge, following the direction of the wires.

## STEP 5

Rinse the rack under running water to remove debris and soap residue.

## STEP 6

Leave the rack to air-dry thoroughly before storing it.
