

# Tips For Cleaning Mesh Motorcycle Jackets

MACHINE WASH COLD  
DO NOT BLEACH  
TUMBLE DRY LOW  
WARM IRON IF NEEDED

Read and adhere to the manufacturer's cleaning instructions.

Remove any removable hard armor or padding before washing the mesh jacket.

Choose a detergent that can be used to wash delicate fabric.

Prefer hand-washing the jacket if it can be machine-washed or hand-washed.

Use cold water for washing and rinsing to prevent damaging the mesh material.

Allow the jacket to soak in the soapy water for at least 15 to 20 minutes.

Handrub or use a soft-bristled brush to remove grease and sweat stains gently.

Rinse the jacket thrice to remove the soap residue. Avoid using bleach to prevent fabric deterioration.

Hang-dry or air-dry the jacket. Do not tumble dry even if it is machine-washable.

Do not iron the jacket to prevent heat damage.
