

STEPS TO INSTALL LIGHT BULBS — IN YOUR — *Bathroom*

Step 1

Gather the necessary tools for the project, including screwdrivers, drills, a ladder, safety glasses, light fixtures, and light bulbs.

Step 2

Turn off the circuit breaker in the electrical panel that supplies power to the existing vanity light fixture.

Step 3

Carefully remove the existing vanity light fixture and the light bulbs to ensure you don't drop the old bulbs or fixtures.

Step 4

Clean and inspect the mounting area to ensure the wall is free from water or mold.

Step 5

Install the new vanity light fixture, considering the type and number of bulbs it will need.

Step 6

Screw the vanity light fixture into the wall and test the new fixture and bulbs before you put the cover on.
