

Tips For Preventing And Eliminating ODOR BUILDUP In Water Shoes

Avoid wearing water shoes for extended periods to prevent sweat-induced fungus buildup.

Dry them properly immediately after each use to reduce germ and odor buildup.

Leave activated charcoal sachets in the shoes overnight.

Periodically wash the shoes with warm water and mild soap to eliminate germs.

If used on the beach or during water activities, wash the shoes after each use.

Scrub the shoes with water and baking soda paste.

Leave the shoes sprinkled with baking soda overnight to remove lingering odor.

Ensure to air dry the shoes thoroughly to prevent mold and mildew.
