

Steps Involved In Setting Up A New *Filtered* *Water Bottle*

Step 1

Go through the usage instructions provided by the manufacturer.

Step 2

Disassemble the bottle and wash each part, except the filter, with mild soap.

Step 3

Rinse the filter under plain running water for 15 to 60 seconds. Do not use any soap or detergent to wash the filter.

Step 4

Attach the filter to the bottle's lid, fill the bottle with water, and reassemble the bottle.

Step 5

Allow the filter to be submerged and soaked in the water for at least 10 minutes.

Step 6

Take a few swift and strong sips of water to activate a steady water flow.
