

Steps Involved In Replacing

A Toilet Flapper

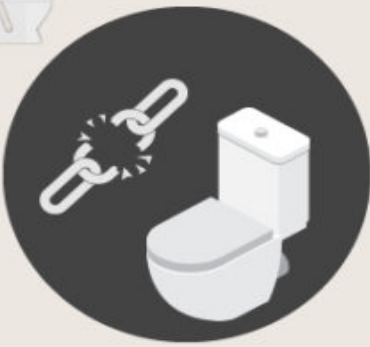

Step 1

Cut off the water supply to the toilet and flush it to empty the tank

Step 2

Open the tank and disconnect the flapper chain from the toilet lever

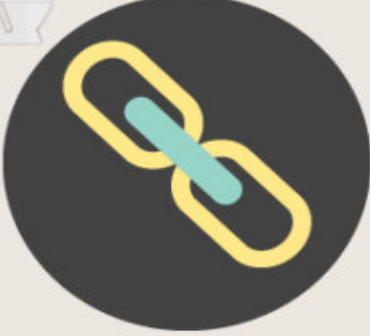

Step 3

Unclip the old flapper from the toilet valve in the tank

Step 4

Clean the valve if necessary

Step 5

Clip on the new flapper on the toilet valve

Step 6

Connect the flapper chain to the toilet lever with the least slack

Step 7

Trim and discard the excess chain

Step 8

Fit the tank lid and restore the water supply
