

Tips For Storing your Headphones

Remove the batteries if the headphones are not going to be used for a long time.

Unplug the cord from the phone or laptop before rolling the cord.

Roll the cord in loose loops to keep them from tangling.

Wrap the end of the cord around the loops to keep them from kinking.

Place the headphones in the center of the stand to keep them from slipping.

Store them in a case or pouch if traveling.

Do not store them such that other objects put pressure on or pinch the headphones and their cord.
