

Ways To Support A Child With Cancer

Provide age-appropriate honest information

Prepare them for the physical changes during chemotherapies

Reassure them about the recovery process

Teach them what to say for queries from peers about the condition

Encourage the child to express their emotions

Connect with other children with cancers or cancer survivors

Help your child connect with friends during hospital stays

Distract and entertain your child in various ways

Be calm in front of them and share your feelings with them

Seek an individualized education plan to cope with missing school
