

Tips To Follow When Using A SHOE PROTECTOR SPRAY

Read and adhere to the manufacturer's usage guidelines.

Clean or polish the shoes before using the shoe protector spray.

If you plan to spray on washed shoes, ensure they are dried thoroughly.

Always use the spray in a well-ventilated area.

Cover the work area with newspaper to prevent the spray from making it slippery.

Shake the spray bottle well before applying.

Hold the spray 20 centimeters away from the shoe to avoid saturation.

Avoid spraying on the insoles and outsoles to prevent slipperiness.

Apply the second coat only after the first coat has dried thoroughly.

Ideally, allow the shoes to dry overnight before use for optimal results.
