

Tips For Using A Crib Mobile

Check the CPSC website for any recalls on the crib mobile model before using it.

Avoid modifying the crib mobile as it may not adhere to safety standards.

Install the mobile out of the baby's reach to prevent them from tugging at it.

Secure the crib mobile firmly to the crib's ceiling, wall, or side rails.

Periodically check the mobile for wear and tear, and discard it if damaged.

Remove the mobile as soon as the baby can get up on their hands and knees.
