

# CORRELATION BETWEEN DATING AND RELATIONSHIP

## COMPANIONSHIP

You get to have a good time with the person and explore common interests during the dating and relationship phases.

## EMOTIONAL SUPPORT

Like in a relationship, people in the dating phase get to know each other better and provide the emotional support they need.

## PRIORITY

Though couples may not be committed during the courtship, they may still prioritize each other, just like in a relationship.

## COMMON GOALS

Both the parties involved in dating or a relationship work towards certain common goals, be it falling into a committed relationship or a long and happy marriage.
