

The Ultimate Non-toxic And All-natural Nail Polish For Children

Kid Licks nail polish was created by a husband and wife team, Audrey Amara and Josh Kroot, after getting inspired to create a child-friendly, non-toxic nail polish for their children. Let's learn more about it.

The Kid Licks nail polish contains a formulation of organic fruits, vegetables, and plant extracts.

The product was created to allow children the freedom to safely paint their nails without an adult, promoting healthy beauty practices.

It is free from synthetic polymers, pigments, and GMOs and is 100% cruelty-free.

The polish can be removed with some water and scrubbing.

Given its food contents and no preservatives, it is harmless if children eat some of it.

These nail polishes are believed to last for two months in refrigerated condition.
