

What To Expect In

In Weeks 40 And 41 Of Pregnancy

If you are nearing your due date, don't worry. The day of your baby's arrival is not far off.

Some mothers may experience a burning sensation while urinating and signs of mild fever at this stage.

If you experience odd sensations, consult your doctor to ensure there are no complications.

Your baby is now approximately 3 to 3.5 kilograms in weight and 50 centimeters in length.

If you experience a heavy discharge from your vagina at this stage, contact your doctor immediately.

Continue to take proper care of yourself and your baby.
