

CLEANLINESS AFTER KINETIC SAND

— PLAY —

Cleaning after kinetic sand play

Wipe the area with a few drops of 3% hydrogen peroxide solution. Leave it for a few seconds and wipe the surface.

You may use half-cup household bleach dissolved in one gallon of water to rinse kinetic sand off surfaces.

Clean plush toys with kinetic sand on them using the washing machine's gentle cycle. Enclose them in a cotton pillowcase while washing.

Warm soapy water might also remove kinetic sand from a few items.

Use a DIY cleaning solution made with a few drops of lime juice, three parts warm water, and one part white vinegar.

Storing kinetic sand

Place the sand in a zip-lock bag after usage.

Store it in a moist-free zone.

Keep the sand away from excess heat or cold.

Do not store it in an open container.
