

Tips To Follow When Using Kitchen Degreasers

Wear protective gloves and goggles.

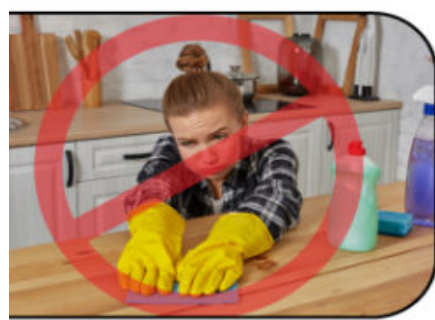

Ensure children and pets are not in the kitchen during the cleansing process.

Test the degreaser on a small, confined area before commencing the cleansing regime.

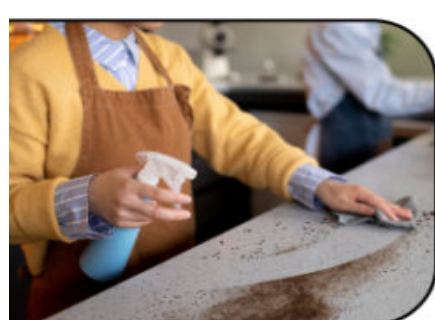

Concentrated degreasers are ideal for thick grease buildup.

Avoid using heavy-duty degreasers on wooden surfaces.

Avoid mixing degreasers with other cleaning agents.

Let the degreaser sit on the soiled area for a while if it isn't a fast-acting one.

After wiping off the muck, give the surface a good rinse to ensure safety.
