

Buying Guide For — College — WINTER BOOTS

The degree of warmth in boots varies depending on the material used, such as fur, wool, or faux fur.

High boots are better for snowy areas, while short boots are more versatile.

It's important to find boots that are both waterproof and breathable to avoid discomfort and odors.

Boots with a good grip on the sole can prevent slipping on icy or snowy surfaces.

Quality and durability are important factors to consider, as they should be able to withstand harsh weather conditions.
