

## More Crib Safety Tips

Put your baby/toddler to sleep only on their back

Choose a safety-approved crib as per your baby's age

Keep a check on the loose joints and hardware periodically

Make sure the crib is free of pointed edges and parts

Do not use bumper pads, as they might help toddlers climb the crib

Discard all plastic wraps after unwrapping new mattresses

Avoid the use of any wedges or positioners in the crib

Place the crib in your room to monitor your toddler
