

# Different kinds of **ANTI-THEFT** Mechanisms **IN BAGS**

## **RFID- Radio Frequency Identification**

An electromagnetic tag is attached to the bag to block unwanted scans of credit/debit cards

## **Lockable Zippers**

These zips seal the bag with an external padlock to restrict access

## **Attached lock systems**

These combination locks are built into the bag and use a code or button-press mechanism

## **Slash guards**

Bags designed with cut-resistant materials inhibit the use of knives and sharp objects

## **Cable locks**

You can provide additional safety by entwining a retractable cable lock on the luggage bag

## **Lockable clips**

Some bags have in-built clips that secure the bag's zippers to curtail access
