

# TYPES OF EDUCATIONAL TOYS FOR DEVELOPING CHILDREN'S Skills

## Building Blocks

These toys enable children to utilize their imagination and creative thinking skills to build objects and shapes.

## Stackable Tiles

These toys introduce children to shapes and their purpose in creating various structures using imagination.

## Circuit-making Toys

These toys involve learning about circuit-making by directly working on imitation circuit boards to ensure safety.

## Spelling Toys

These toys help children learn to spell things they encounter in their environment in a more fun and interactive manner.

## Flashcards

These include cards on various academic and general topics, primarily used to help children retain most of the information they learn.

## Puzzles

These are among the best educational toys that help improve problem-solving skills among children.

## Science Activity Kits

These toys expose children to the fun side of science by engaging in a plethora of safe science experiments.
