

# Tips On Using Depilatory Cream Nair In Pregnancy

Avoid using the product during the first trimester of pregnancy.

Consult a doctor before using it in the second or third trimester.

The cream may cause headaches and nausea due to the strong smell.

Pregnancy can increase breast sensitivity, so be watchful of allergies or discomfort.

When visiting a salon, check if the staff is trained to work with expecting mothers.

Consider chemical-free hair removal options such as shaving, tweezing, and waxing.
