

Bottled Water Safety

For Your Baby

Bottled Water Requirements

Sodium

It should contain less than 250mg of sodium per liter of water.

Sulfate

It should contain less than 250mg of sulfate per liter of water.

Fluoride

It should contain 0.11mg of fluoride per liter or ppm. But if you can find one with a lesser quantity, that may make a better choice.

Baby Formula With Bottled Water

- 💧 Boil the water before use and let it cool down.
- 💧 You may not boil the water if it is labeled as 'sterile' and meets the FDA standards
