

# Features To Consider When Choosing A Monitor

## Monitor resolution

Pick a monitor with high resolution to enjoy clear and better images.

## Aspect ratio

Select monitors with a 16:9 aspect ratio as it provides a great viewing experience.

## Contrast ratio

A high contrast ratio is suitable for watching movies at night as it helps to see the finest shade.

## HDR

Monitors with HDR offer better image quality and a good viewing experience.

## Ports

Monitors with ports are an added benefit as they help establish a connection between a monitor and other devices.

## Brightness

A monitor with 300 to 350 cd/m<sup>2</sup> is suitable for a well-lit room, or you can rely on monitors with 250 cd/m<sup>2</sup>.
